# PRESS RELEASE

FOR IMMEDIATE RELEASE

## **The M14/M1A Blackfeather® “RS”: A New Generation M14/M1A Platform Rifle Stock**

*Lighter, Faster, Balanced, Accurate and Modular: The M14.ca Blackfeather® “RS” is a Completely New “Rifle System” for the M14.*

### CONTACT:

The Upgrade Path® Inc., Tel. (250) 721-3444, Email: [info@m14.ca](mailto:info@m14.ca)

**VICTORIA, BC, CANADA** – The M14.ca Blackfeather® “RS,” a new generation M14 rifle stock made from 6061 T6 aluminum and 4140 HTSR steel, is a “rifle system” that offers new modularity for the M14/M1A family of rifles. It is lightweight, fast-handling, and improves on US GI stock balance and ergonomics.

### Key Features of The Blackfeather® “RS” Rifle System Include:

- Enhanced accuracy via a “tunable,” self-lubricating, quad-locked oprod guide with a steel anti-wear plate
- The first M14 “keyed in a track system” of removable picatinny rails at 3, 6 and 9 o’clock
- The first M14 interchangeable butt stock back end adapter (available as low | high & folding in 2012)
- Adaptability for all AR15 butt stocks (carbine, fixed tube and rifle)
- Natural ergonomics (trigger group scalloping affords trigger finger ready position, US GI curved fore end)
- Superb balance, handling and light weight (2.8lbs. with Magpul pistol grip & Ace Ltd. UL-M buttstock)
- Ease of disassembly (remove one grade 8 frame bolt and your trigger group)
- CNC machined receiver bedding based on original US GI drawings ensure tight receiver to stock fit
- Interchange of components like no other: system “fits” rifle to rifleman as situations demand

- Availability of additional M14.ca oprod guides allows M14 barrel/receiver groups to be swapped quickly, at a cost savings, much like AR15 uppers (numerous configurations with multiple rifles possible)
- Availability of multiple compatible scope mounts for the M14.ca Blackfeather include the CASM, CASM “GEN II” in aluminum and steel, the CASM “MRD” red dot mount and the CASM “RD” mount.
- Design in part by a retired gunsmith and former Canadian military officer
- Two years in development, 13 prototypes, 640+ machine hours, plus range trials over 2 months.

In conclusion, the M14.ca Blackfeather® “Rifle System” is an innovative, new generation , enhanced, modular M14 rifle stock like no other. It improves accuracy via an advanced oprod guide, offers superior CNC precision receiver bedding surfaces, a rigid monolithic fore arm, all in a fast-handling, well-balanced, light weight package that offers theM14 rifleman unsurpassed component interchange-ability.
