- 1 x Blue Loctite® 243 package*
- 3 x spare screws (1 of each type)*

Description:

The M14.ca® designed base with hood is designed to securely attach, adjust and protect the Jpoint® red dot for optimal use on your M14/M1A rifle. The hood completely encloses and protects the Jpoint® inside which is in an always on, rifle ready state (the battery lasts for 9 months and costs approx. \$1).

The Jpoint® itself includes a built-in sight notch which can also provide a back up sight picture should the red dot become damaged. A secondary benefit while cleaning, maintaining or upgrading parts for your rifle, the hood will support and balance the M14/M1A while upside down.

As with our other designs, the "MRD" base with hood is rock solid and will protect your Jpoint® from damage under the most severe conditions.
